Education

National Institute of Technology Kurukshetra	2024 – Present
B.Tech in Computer Science Engineering	CGPA: 9.37
RPS Public School Rewari	2024
Class XII	96.6%
RPS Public School Rewari	2022
Class X	99%

Skills

Languages: C++, Python, JavaScript, Java

Frameworks / Technologies: React.js, Node.js, Express.js, HTML, CSS

Core Concepts: Data Structures and Algorithms, Object Oriented Programming, Operating Systems, DBMS, REST APIs

Projects

HostelHive — Full Stack Hostel Management System

[GitHub](#)

React.js, Node.js, Express.js

- Developed a **full stack hostel management platform** to streamline hostel operations including complaints, leave requests and service management.
- Built secure **RESTful APIs using Node.js and Express.js** to manage authentication, complaints and request workflows.
- Designed a **dynamic React.js frontend** with reusable components to ensure responsive UI and seamless user interaction.
- Implemented structured backend data handling for efficient storage of **student records and hostel service requests**.

Swiggy Frontend Clone

React.js, JavaScript, HTML, CSS

- Built a **responsive frontend clone of Swiggy** focusing on scalable component based architecture.
- Developed reusable **React.js components** for restaurant cards, menus and navigation layouts.
- Integrated **API based restaurant data** to dynamically render food listings and restaurant details.

Weather Application

JavaScript, HTML, CSS, Weather API

- Developed a **real time weather forecasting application** fetching live data through public weather APIs.
- Implemented asynchronous **JavaScript API requests** to dynamically display temperature, humidity and weather conditions.

Achievements

- Awarded a **Merit Certificate** for achieving the **second-highest CGPA** in the first semester.
- Secured **99.7 percentile in JEE Main** and qualified **JEE Advanced**.
- Solved **900+ Data Structures and Algorithms problems** across coding platforms including LeetCode and GeeksforGeeks.
